Notes

- Rounded slat ends are included in the price for Quarter Circle, Arch/Eyebrow Arch, and Extended Arch/Eyebrow Arch blinds, and offer better light control and a more finished appearance, which these shapes require.
- Angle and Extended Angle blinds are available with square slat ends only; rounded slat ends do not enhance these shapes.
- Slats come standard angled up to 45°. Specify slats angled down 45°, if desired.
- Price is based on the "A" dimension; see Specialty Shapes — Non-Operable, 2" & 2½" in the Everwood Reference Guide.

Notes
- Maximum fabric valance width without turning the fabric is the same as Clutch Standard Max. Width minus 3".
- To reach a Max. Width of 120", valance fabrics will require turning. A fabric that has a pattern or texture may not match the pattern or texture of the shade. Only fabrics on Fabric Valances can be turned; fabrics on shades can not be turned due to instability.
- For OB without returns and IB: Maximum fabric valance width without turning the fabric is the same as Clutch Standard Max. Width minus 3".
- For OB with returns: Maximum fabric valance width without turning the fabric is clutch standard Max. Width minus 5".

## DRS-1 Dust Cover Valance Pricing

Notes
- Without turning the fabric, the maximum width of a Dust Cover Valance is dependent on return length and is always narrower than the maximum shade width. To reach the same maximum width, Dust Cover Valance fabrics will require turning. A fabric that has a pattern or texture may not match the pattern or texture of the shade. Only fabrics on Dust Cover Valances can be turned; fabrics on shades can not be turned due to instability. Turned option for Dust Cover Valance must be selected at ordering. The maximum width of a Dust Cover Valance with turned fabric is 120". All fabrics can be turned.

# Shutters

HERITANCE® HARDWOOD SHUTTERS

NEWSTYLE® HYBRID SHUTTERS

PALM BEACH® POLYSATIN™ SHUTTERS

Product price only, not including freight, state/local taxes, measuring and installation, and other services associated with a custom installation.
For the most accurate pricing for the exact ordered shade dimensions, refer to the Mobile Selling App or Direct Connect.

# Heritance "How to Price"

**Base Price Imported** — The base price grids reflect the lower pricing provided by our expanded hardwood shutter operations. This is an import program and comes with longer lead times. Orders will default to Base Price — Imported except for configurations that are only available with Domestic Direct.
**Domestic Direct Surcharge Option** — For customers needing a faster lead time or wanting shutters made in the USA, the Domestic Direct option is available.

Notes

- All lead times for both options and options only available with Domestic Direct can be found in the Newsroom.
- Shipping costs remain the same for both Base Price Imported and Domestic Direct.

## How to Price Heritance® Hardwood Shutters

The base prices on the Heritance® price charts are for Framed or Unframed, painted standard hinged panels. Framed pricing includes any of the Heritance frames. A surcharge needs to be applied for stained colors, and for any other configuration. Follow these basic pricing procedures:

1. Round up the ordered width and height dimensions to the nearest size shown on the price chart.
2. Locate the box where the correct width column meets the correct height row.
3. If the width exceeds the largest width on the chart, add the appropriate amount for each additional 6" of width.
4. Add any necessary surcharges. For surcharges, see "Heritance Surcharges & Accessories" on page 127. Track configuration and arch top and angle top panel surcharges are width-based. All other surcharges (or deductions) are shown as a percentage of the base price or as a dollar amount.

The pricing examples below are rounded to the nearest dollar for illustration purposes.

Notes:
- For stackback track configurations, first locate the base price for the shutter width and height. Next, use the stackback width to determine the track surcharge. Add this surcharge to the shutter base price to arrive at the total price for the stackback configuration. See "Heritance "How to Price"" on page 121 and Stackback Design.
- Track systems greater than 120" in width must be priced in Direct Connect.
- Units with panel widths less than 27½" may not be built with SoftClose™ for Bypass, depending on the configuration.

# NewStyle "How to Price"

## How to Price NewStyle® Hybrid Shutters

The base prices on the NewStyle price charts are for Framed or Unframed standard hinged panels. Framed pricing includes any of the NewStyle frames. A surcharge needs to be applied for any other configurations. Follow these basic pricing procedures:

1. Round up the ordered width and height dimensions to the nearest size shown on the price chart.
2. Locate the box where the correct width column meets the correct height row.
3. If the width exceeds the largest width on the chart, add the appropriate amount for each additional 6" of width.
4. Add any necessary surcharges. For surcharges, see "NewStyle Surcharges & Accessories" on page 136. Track configuration and arch top and angle top panel surcharges are width-based. All other surcharges (or deductions) are shown as a percentage of the base price or as a dollar amount.

The pricing examples below are rounded to the nearest dollar for illustration purposes.

Notes:
- Shutters greater than 120" in width or height must be priced in Direct Connect.
- Prices in the 12" column include a surcharge for narrow panels.
- For surcharges and other pricing details, see "NewStyle Surcharges & Accessories" on page 136. Surcharges are added to the base price.
- For arch top and angle top panels, base price is determined by tallest overall height.
- Only Bi-Fold and Bypass track frames include build-out at no additional charge. All other build-out options must be ordered as lineal materials.
- Additional freight charges apply. Contact Customer Service for current rates.

Product price only, not including freight, state/local taxes, measuring and installation, and other services associated with a custom installation.
For the most accurate pricing for the exact ordered shade dimensions, refer to the Mobile Selling App or Direct Connect.

# NewStyle Specialty Shapes Price Grids

## Specialty Shape Pricing

- **Important Note!** All base prices are predicated on Ordered Dimensions.
- Round the ordered width of the specialty shape up to the nearest width shown on the appropriate chart. The price beneath that width is the suggested retail price.

### Standard Shutter Pricing

- If a standard shutter is being ordered in combination with the specialty shape, price that standard shutter using the standard price charts.

Notes

- Due to the endless range of options available, special charges may apply for orders outside the published product specifications; contact Customer Service for a quote.

Notes:
- For stackback track configurations, first locate the base price for the shutter width and height. Next, use the stackback width to determine the track surcharge. Add this surcharge to the shutter base price to arrive at the total price for the stackback configuration. See "NewStyle "How to Price"" on page 130 and Stackback Design.
- Track systems greater than 120" in width must be priced in Direct Connect.
- Units with panel widths less than 27½" may not be built with SoftClose™ for Bypass depending on the configuration.

# Palm Beach "How to Price"

## How to Price Palm Beach™ Polysatin™ Shutters

The base prices on the Palm Beach™ price charts are for framed or unframed standard hinged panels. Framed pricing includes any of the Palm Beach frames. A surcharge needs to be applied for any other configurations. Follow these basic pricing procedures:

1. Round up the ordered width and height dimensions to the nearest size shown on the price chart.
2. Locate the box where the correct width column meets the correct height row.
3. If the width exceeds the largest width on the chart, add the appropriate amount for each additional 6" of width.
4. Add any necessary surcharges. For surcharges, see "Palm Beach Surcharges & Accessories" on page 145. Track configuration, specialty shape, and decorative sill cover surcharges are width-based. All other surcharges (or deductions) are shown as a percentage of the base price or as a dollar amount.

The pricing examples below are rounded to the nearest dollar for illustration purposes.

Notes:
- For stackback track configurations, first locate the base price for the shutter width and height. Next, use the stackback width to determine the track surcharge. Add this surcharge to the shutter base price to arrive at the total price for the stackback configuration. See Palm Beach "How to Price" and the Stackback Design section of the Palm Beach Reference Guide section..
- Track systems greater than 120" in width must be priced in Direct Connect.
- Units with panel widths less than 27½" may not be built with SoftClose™ for Bypass depending on the configuration.

## Skyline Design Option Surcharges[1]

- Panel Width Override — $225 per unit
- Spliced Headrail, Valance, or Large Square Cassette 2.0 [2] — $225 per unit
- Room Divider Kit — $65 per kit

[1] Add to base price.
[2] Order a retrofit Large Square Cassette 2.0 for outside mount (OB) units at the same width as existing headrail.
- The Large Square Cassette 2.0 will be 1/2" wider than existing headrail, and will add 1 1/4" to overall height of the panel.
- This additional 1 1/4" of vertical mountingn space is required to ensure panels are not too long.
- Space to allow for an additional 1/2" in width is also required to ensure a proper installation.
- **Retrofit Large Square Cassette 2.0 is only available for existing outside mount (OB) Skyline units.** The retrofit Large Square Cassette 2.0 option is not available for existing inside mount (IB)/ceiling mount (CB) units due to additional mounting space required in both width and height.

Notes
- The following automatically default to a spliced headrail, valance, or Large Square Cassette 2.0 at no charge: headrail/Large Square Cassette 2.0 widths greater than 188". Should a spliced headrail, valance, or Large Square Cassette 2.0 at widths narrower than listed be desired, the surcharge shown above will apply. The maximum width of a panel with a Sleek Metal Valance is 383 1/8". PowerView® headrails cannot be spliced.
- Headrails, valances, and Large Square Cassette 2.0 ordered with the spliced option will be cut in two equal pieces. They are easily reconnected with the attached splice clip.
  - During installation, place the mounting brackets within 2" of each side of the splice. Doing so will ensure the splice is unnoticeable and operates as one continuous unit.
  - The Skyline splice clip should not be attached to the window frame, the ceiling, or to any bracket.
  - A color-coordinated splice cover is provided for spliced Large Square Cassette 2.0.
- The top of the bracket needs to be mounted to the ordered unit height plus an additional 1/2" for the desired floor clearance.

Product price only, not including freight, state/local taxes, measuring and installation, and other services associated with a custom installation.

Notes

- Edge banding is recommended on grass fabrics and inside mount Roman valances to help protect edges from fraying.
- Edge banding is not available on the Cornice valance.
- If edge banding is ordered on a horizontal unit, both shade and valance come with edge banding on the sides. The edge banding for the valance is included in the above surcharges.
- If edge banding is ordered on a stand-alone valance, the above surcharges for height to 36" apply.
- With vertical drapery, Wide Grosgrain edge banding is included on the top and bottom edges of the panel. Side and bottom edge banding is optional on the valance at no additional charge.

Product price only, not including freight, state/local taxes, measuring and installation, and other services associated with a custom installation.
For the most accurate pricing for the exact ordered shade dimensions, refer to the Mobile Selling App or Direct Connect.
